

Study of the economic aspects linked to the development and the running of manned suborbital flights.

Address one of the following topics:

1.

Study of the market segmentation of the different possible applications (tourism, science, training of astronauts, launch of small satellites ...) and propose a business plan for your company,

2.

Study of socio-economic aspects linked to the creation of a spaceport in an area (features of the spaceport will be assessed according to reports from [Art and Space](#) and [Grand Earth](#) teams (2012-2013)).

General characteristics for the reference vehicle:
